Interpet has applied over 60 years of aquatic experience to ensure every element of the design of this product has been carefully considered to help you enjoy aquarium keeping.

Interpet

Delta therm heater

- Precise and reliable temperature control
- Easy to adjust
- Shatter resistant

LIFE SUPPORT

FOR TROPICAL OR MARINE AQUARIUMS

150 watts
FOR AQUARIUMS
UPTO 135 LITRES (30 GAL)

Why do I need a heater?

Fish from Tropical countries require a stable temperature of around 24°C to remain healthy and thrive. A Deltatherm heater is easy to adjust to meet your fishes exact temperature needs and reliably keeps the water at the set temperature. For convenience the heater is factory set to 24°C.

Where does it go?

Deltatherm should be fitted with supplied suckers fully submerged diagonally - see image.

LIFE SUPPORT

High quality products, essential for the long-term health and well-being of your aquarium plants and fish.

Installation

- Before installing your Deltatherm heater, ensure the glass tube has not been damaged in transit.
- Fix the suckers to the heater (see 'Where does it go?' diagram on side of pack) adjust the dial on top of the heater to required temperature.
- Position the heater, after filling the aquarium. Ensure the heater is completely submerged.
- Plug in and turn on.
- Monitor the water temperature using an aquarium thermometer.
