What & why?

Fully compatible with all Tri-Spec HO lighting units, simply replaces the standard switch unit and allows for a range of instant customisable lighting controls via most smart phones or tablets.

A timer is recommended to regulate the lighting in your aquarium to create a natural day/night cycle for healthy fish & plants.

The sunrise & sunset features ensure a gentle change in light levels preventing fish stress. Also inbuilt with 3 hours of blue moon lighting to allow for after dark viewing and night time ripple effect.

Interpet
Tri-Spec
App controller

- ▶ **Lighting control at your fingertips**
 - Choose the colour spectrum
 - Set when the light comes on and for how long
- ▶ **Sunrise, sunset and bluemotion effects**
- ▶ **Settings saved during power disruptions**

LIFE SUPPORT
FOR COLDWATER OR TROPICAL AQUARIUMS

POWERED BY BLUE-TOOTH TECHNOLOGY

Installation

Turn off power to your Tri-Spec lighting unit, then simply replace the existing inline switch unit with the Tri-Spec App Controller. Once correctly installed, switch power back on and download the app from the App Store. See enclosed for full installation instructions.

LIFE SUPPORT

High quality products, essential for the long-term health and well-being of your aquarium plants and fish.

Other info

For more information on getting started, choosing fish and plants and maintaining your aquarium, go to: www.interpetaquatics.co.uk/ledlighting or speak to your aquatic retailer.
